

Please reject NAB's petition 04-160 and allow XM radio to continue to provide the best selection of music, weather, and traffic reports around. It is superior to the stations we have available around here. Traffic and weather reports on our radio stations is not existent. XM is wonderful. They survey what we are interested in hearing or not hearing and they keep us informed of their agenda's. You don't get that with the standard stations we have throughout the southeast.

Please reject this petition.

Sincerely,

Cynthia Alexander
